Opening a New Shopping Mall in Bhubaneswar, India

By: Rasmikant Das
Feb 2021

Business Problem

- Location of the shopping mall is one of the most important decisions that will determine whether the mall will be a success or a failure

- Objective: To analyze and select the best locations in the city of **Bhubaneswar, India** to open a new shopping mall

- This project is timely as the city is currently suffering from oversupply of shopping malls

- Business question
    - In the city of Bhubaneswar, India, if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

Data

- Data required
  - List of neighbourhoods in Bhubaneswar
  - Latitude and longitude coordinates of the neighbourhoods
  - Venue data, particularly data related to shopping malls

- Sources of data
  - Wikipedia page for neighbourhoods (https://en.wikipedia.org/wiki/List_of_neighbourhoods_in_Bhubaneswar)
  - Geocoder package for latitude and longitude coordinates
  - Foursquare API for venue data

Methodology

- Data Collection and extraction for neighbourhoods list
- Get latitude and longitude coordinates using Geocoder
- Use Foursquare API to get venue data
- Group data by neighbourhood and taking the mean of the frequency of occurrence of each venue category
- Filter venue category by Shopping Mall
- Perform clustering on the data by using k-means clustering
- Visualize the clusters in a map using Folium

Results

- **Categorized the neighbourhoods into 3 clusters :**
    - **Cluster 0: Neighbourhoods with moderate number of shopping malls**
    - **Cluster 1: Neighbourhoods with low number to no existence of shopping malls**
    - **Cluster 2: Neighbourhoods with high concentration of shopping malls**
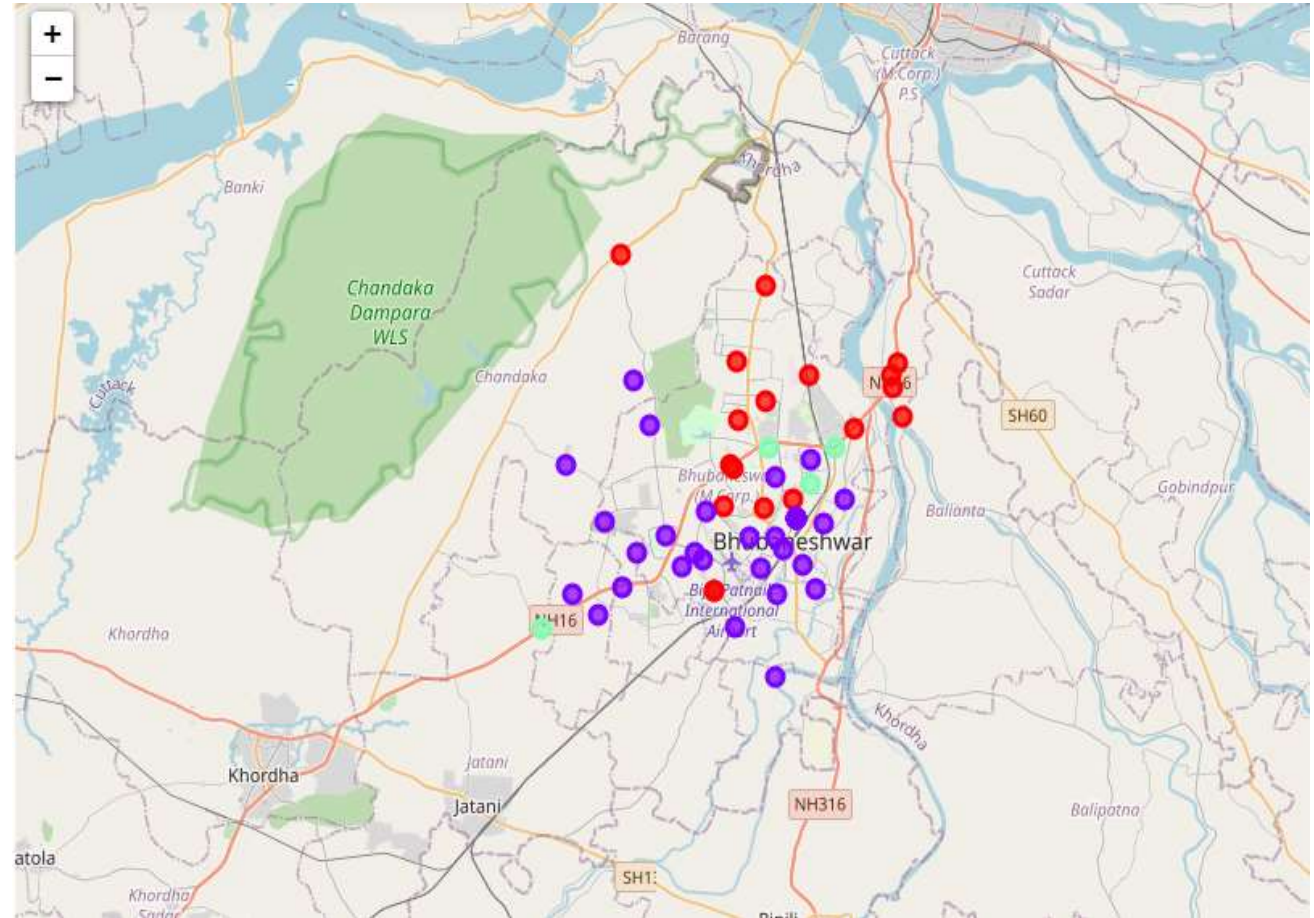

Discussion

- Most of the shopping malls are concentrated in the central area of the city

- Highest number in cluster 2 and moderate number in cluster 0

- Cluster 1 has very low number to no shopping mall in the neighbourhoods

- Oversupply of shopping malls mostly happened in the central area of the city, with the suburb area still have very few shopping malls

Recommendations

- Open new shopping malls in neighbourhoods in cluster 1 with little to no competition

- Can also open in neighbourhoods in cluster 0 with moderate competition if have unique selling propositions to stand out from the competition

- Avoid neighbourhoods in cluster 2, already high concentration of shopping malls and intense competition

Conclusion

- Answer to business question: The neighbourhoods in cluster 1 are the most preferred locations to open a new shopping mall

- Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

Thank You
